Skills

HTML CSS JS , C++,C , JAVA , SQL

Programming

Web Development

Education

bachelor of computer application
SRI RAMAKRISHNA MATRICULATION HIGHER SECONDARY SCHOOL, CHENNAI

I am a **passionate and detail-oriented Bachelor of Computer Applications (BCA) student** with a deep interest in **frontend development**. I am dedicated to designing and developing **visually appealing, interactive, and user-friendly web applications** that enhance the overall user experience. My enthusiasm for web technologies drives me to continuously **learn, explore, and implement** the latest industry trends, best practices, and modern frameworks.

I am eager to **expand my knowledge** in **HTML, CSS, JavaScript, and frontend frameworks like React.js** to build dynamic and responsive websites. My goal is to craft innovative, high-performance, and accessible digital solutions that provide seamless interactions for users.

I am actively seeking opportunities to **enhance my technical expertise**, collaborate with like-minded professionals, and contribute to projects that challenge me to grow as a **frontend developer**. With a keen eye for detail and a commitment to writing clean, efficient code, I strive to bridge the gap between **aesthetics and functionality** in web development.
